

# Microcontroller Electrical notes

---

- Has a boot pin of some sort,
- Original design was for an stm32f401 but the new design is for f103 due to price
- Validate if the non gpio control pins are still proper and in place

To clarify the dev board I am using contains an stm32f103C8 While the the one that has been ordered is sthe stm32f103RCT6

The RCT6 <codename>
